NOTICE OF PUBLIC HEARING

concerning

RENEWAL OF WASTE DISCHARGE REQUIREMENTS

NPDES PERMIT NO. CA0078441

FOR

CITY OF DUNSMUIR

WASTEWATER TREATMENT PLANT

SHASTA AND SISKIYOU COUNTIES

The City of Dunsmuir (Discharger) is the owner and operator of the Dunsmuir Wastewater Treatment Plant (hereinafter Facility), a publicly owned treatment works. The Facility is located in Dunsmuir, California. The Facility provides sewerage service for the City of Dunsmuir and serves a population of approximately 1,580. The design average dry weather flow capacity of the Facility is 0.30 million gallons per day. The Discharger is currently authorized to discharge disinfected advanced secondary treated wastewater to the Sacramento River, a water of the United States, seasonally from September 16 through June 14.

Discharges to the Sacramento River from the Facility are currently regulated by Waste Discharge Requirements (WDRs) Order R5-2012-0085 (NPDES Permit No. CA0078441), issued by the Central Valley Regional Water Quality Control Board (Central Valley Water Board) on 4 October 2012. An Order is proposed to renew the NPDES permit. The proposed Order includes new or updated effluent limitations for copper, zinc, dichlorobromomethane, ammonia, biochemical oxygen demand, and total suspended solids. The proposed Order removes effluent limitations for settleable solids and nitrate plus nitrite because the discharge does not demonstrate reasonable potential to cause or contribute to an exceedance in the receiving water and the Facility is adequately controlling the discharge for these parameters.

A public hearing concerning this matter will be held during the Central Valley Water Board meeting scheduled for:
